

Aaron Beavers

Software Engineer

Annandale, NJ 08801

foamy125@gmail.com

5015145110

Professional Summary

I am a Full stack developer fluent with many frameworks, and a strong capacity to learn. I am a javascript master, though I've also had significant experience with ruby and python.

I am driven, self taught, and excited to write software of any kind. I write games, websites, backends, machine learning solutions, twitter and facebook apps. I am always pushing my limits. I have real world experience working with node.js/express/react/angularjs/sails, and ruby on rails. I have ran deployments for existing applications to elastic beanstalk, as well as deployed new applications. I have worked with startups of ranging sizes, to pre revenue, middle stage, 2-4 year running projects, to late stage, well funded start ups going on 5-8 years.

Primary Skills

- Javascript Development (front end and backend)
- Ruby (on rails)
- Python
- Lisp
- Object oriented Programming
- Functional programming

JavaScript Frontend Frameworks

- jQuery
- Angular
- react
- vue

WebRTC frameworks

- Jitsi Meet
- Janus
- Media Soup
- QuickBlox

Machine learning Enthusiast

- Tensorflow
- DeepSpeech
- Google transcription service
- Honk Keyword Spotting

As well as my experience with full stack web development with ruby on rails and node js, I have experience working with python on machine learning projects (my true passion), and with flask. I have worked with DeepSpeech, a voice transcription model, I have worked with Honk, a keyword spotting architecture, and I have played around with GAN architectures.

Authorized to work in the US for any employer

Work Experience

Freelance Software Engineer

Self employed

January 2014 to Present

I did miscellaneous work on many smaller projects until my first job with a team.

I write games, websites, backends, machine learning solutions, twitter and facebook apps, and what ever else I find. I am always pushing my limits.

- Express
- Angular
- React
- CommonLisp
- Python
- Tensorflow
- Node.js
- Sails.js
- Bootstrap
- lodash
- underscore
- Discord API
- Twitter API
- Facebook API
- Game engine development
- Ant Colony Optimization
- Plant life simulations
- Text chat bots with neural networks and markov models
- Ruby
- Unity

Full Stack Engineer

Raft.tech

July 2020 to September 2023

- ruby on rails
- graphql
- react
- redux
- test driven development
- Pair programming
- python
- django
- circleci
- cloud foundry
- cloud.gov

Full Stack Engineer

1brand-Seattle, WA

September 2019 to June 2020

- Next.js server side rendering
- GraphQL
- Apollo client
- Pair programming
- Color picker
- Image colorizer
- Canvas API
- Stripe
- Chargebee
- Nest.js
- Kanban work flow
- Antd design framework for react

Full Stack Engineer

Birdseed

February 2019 to August 2019

- Ruby
- Rails
- Javascript
- PostgreSQL
- jquery
- Bootstrap
- FontAwesome
- Important player
- Ran deployments to aws elastic beanstalk
- Took lead during original developers absence
- Desktop client with electron
- Mobile app with meteor js
- Frontend widget with Webpack
- Many small improvements backend Controllers and Models
- rails template work (erb)
- Database Migrations
- Primary code reviewer at one point
- Circle CI
- JQuery
- RecordRTC video message recording
- Web chat
- Calendar scheduling

.

Full Stack Engineer

Cloudapp-San Francisco, CA

September 2018 to February 2019

- Ruby
- Rails
- Sinatra
- Rspec
- Capybara
- JavaScript
- Python
- React
- Angular
- JQuery
- Bootstrap
- Node.js
- pixi.js
- Github integrations
- CircleCI
- TravisCI
- AWS Elastic Beanstalk
- AWS Lambda

Education

High school or equivalent

Valley Springs High School-Valley Springs, AR
September 2008 to May 2012

Skills

GitHub HTML node.js APIs XML TypeScript Web Services webrtc
JSON Python Angularjs Computer science Jira Bootstrap reactjs AWS
Agile Angular Java Nodejs React PHP Unit Testing MySQL Javascript
Microservices ruby on rails JQuery User Interface (UI) Git REST UI
development HTML 5 Full-stack development SQL Docker express.js Node
CSS C
